🎬 INTRO: Productivity is a Scam (Unless You Use This)

You've tried everything: To-do lists. Sticky notes. Productivity apps named after animals. That one podcast where a guy with a smooth voice tells you to drink more water and "manifest results."

None of it works because your brain doesn't want "hustle." It wants to feel smart, fast, and maybe a little superior.

Good news: With these 100 ChatGPT prompts, you're about to outsmart your brain and your inbox — while laughing your way through the chaos.
Let's go.
