What are Insulated Panels

- Insulated panels are advanced building materials designed to provide superior thermal insulation, structural strength, and aesthetic appeal. Commonly used in commercial, industrial, and residential projects, these panels consist of a high quality rigid insulation core Expanded Polystyrene, sandwiched between two outer layers of protective metal sheeting “Chromadek steel”. This combination results in panels that are lightweight yet strong, energy-efficient, fire-resistant, and easy to install.
- Insulated panels are ideal for use in cold rooms, warehouses, factories, clean rooms, modular buildings, roofing, and wall cladding. They offer excellent temperature control, reduce energy consumption, and minimize construction time. EPS core panels with Chromadek cladding are especially popular due to their cost-effectiveness, moisture resistance, and customizability in thickness, colour, and dimensions

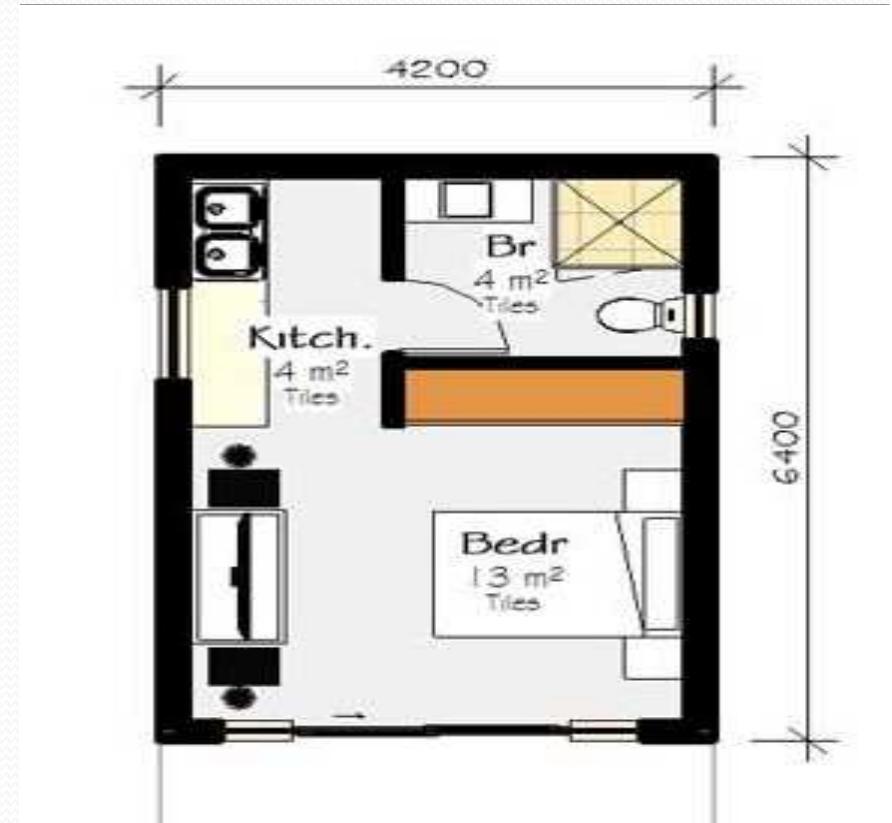

B Better Building

- Is a trusted manufacturer and installer of high-performance insulated panels, specializing in EPS and Chromadek panel systems. Based in Alberton, we serve a wide range of industries including logistics, food processing, pharmaceuticals, agriculture, and construction. Our panels are engineered for long-lasting performance in environments where insulation, hygiene, and durability are critical.
- We pride ourselves on precision manufacturing, customized solutions, and professional on-site installation. With an experienced team, modern production facilities, and a commitment to quality and innovation, we help our clients build faster, smarter, and more sustainably. From design consultation to project completion, we provide expert support every step of the way.
- Whether you're constructing a cold storage facility, an insulated warehouse, or modular structures, B Better building delivers solutions that meet both your technical requirements and budget — without compromising on quality.

1 Bedroom House 27m²

- Concrete flooring with tiles
- Top Structure with windows and doors
- Electrical
- Plumbing
- Kitchen Cupboards
- Built in Cupboards
- Including Installation
- **R 268 823.68**

Excluding Delivery and P's &G's

2 Bedroom House 74m²

- Concrete flooring with tiles
- Top Structure with windows and doors
- Electrical
- Plumbing
- Kitchen Cupboards
- Built in Cupboards
- Including Installation
- **R 597 572.30**

Excluding Delivery and P's & G's

3 Bedroom House 65m2

- Concrete flooring with tiles
- Top Structure with windows and doors
- Electrical
- Plumbing
- Kitchen cupboards
- Built in cupboards
- Including installation
- **R 609 626.95**

Excluding Delivery and P's & G's
