

GinkgoSense: For Memory and Vision Health

When blood flows to the extremities, oxygen and nutrients circulate all the way to toes and fingers and reach the brain and eyes as well. GinkgoSense delivers a unique combination of natural ingredients that boost blood circulation and nutrient delivery to help maintain cognition and eyesight.

Ashwagandha provides an adaptogenic herb that has been shown to assist body systems in adapting to stressors, moods and inattentiveness¹.

The Key Benefits and Features of GinkgoSense

- Helps to maintain memory, concentration and mental clarity
- Helps maintain mental acuity
- Improves neuroplasticity
- Supports healthy vision
- Improves the filtration of blue light
- Helps to maintain blood flow to the extremities
- Standardized extracts for consistent results
- Synergistic effect — ingredients work together to improve each other
- Vegan formula

The NEW GinkgoSense Formulation

Ginkgo Biloba Leaf Extract

Curcumin Root Extract

Ashwagandha Root

Ginger Root

Black Pepper Extract

Lutein }
Zeaxanthin } Marigold Flower Extract

Blue Light Bombardment

The widespread use of computers and smart phones has unleashed the risk of retinal damage on everyone that utilizes them long-term. The younger you begin using them, the longer you are subjected to blue light emanating from device screens. It's healthy from

occasional sun exposure, but too much blue light can be damaging to your vision. GinkgoSense helps to protect your eyes from overexposure to blue light with therapeutic amounts of lutein and zeaxanthin².

Curcumin adds turmeric's inflammation-reducing and cognitive-boosting compound to the GinkgoSense formulation.

Benefits of GinkgoSense

- Helps Neuro Health
- Benefits Cardiovascular Health
- Improves Brain Function, Memory, Concentration and Mental Clarity
- Maintains Eye Health
- Improves Blood Flow
- Antioxidant Protection

Fun Facts about Ginkgo

- Ginkgo is one of the oldest living trees on the planet. It's about 350 million years old¹
- It is the number one selling herbal medicine in Europe²
- A Ginkgo tree can live for thousands of years³
- It is a symbol for changelessness and immeasurable past. It's no wonder that it's associated with a better memory!

Lutein

Many call lutein the "eye vitamin." It's a carotenoid vitamin and is most notably found in carrots. It is believed that it protects the eyes from damage caused by sunlight.

Lutein and zeaxanthin filter out some harmful wavelengths of light and protect the eyes. Out of all the carotenoids in the world, only these two are deposited in high quantities in the eyes.

Why Get More Lutein?

- Eye health
- The body doesn't produce it naturally
- May improve vision in people with age-related macular degeneration
- Helps protect the skin
- Healthier veins
